Dr. David F. McQueeney Vice President, Technical Strategy & Worldwide Operations IBM Research Yorktown Heights, NY davidmcq@us.ibm.com

Dave McQueeney is Vice President, Technical Strategy & Worldwide Operations at IBM Research. Dave is responsible for setting the direction of IBM's overall Research Strategy across twelve worldwide labs and leading the global operations and information systems teams. In this capacity, Dave leads the annual creation of the Global Technology Outlook, 3 - 10 year technology projections which guide IBM's R&D directions along with its acquisition strategies.

Dave's background covers a wide range of disciplines ranging from solid state Physics, to high-speed interconnect design, to distributed software development tools, to participation in a startup software company in Scientific Data Analysis, to Government-specific industry solutions. Dave has spent about half of his career as a researcher and research executive, and half in IBM's customer-facing units including Global Services, Sales and Distribution and Software Group. Dave has been the CTO for IBM's Federal business, the Global Government Solutions General Manager and leader of the IBM Federal Systems Integration services unit.

Throughout his career, Dave has driven strong connections between IBM Research and IBM's clients, as well as the other units of IBM. Dave was recognized by Consulting Magazine as one of the top 25 consultants for 2002, citing his work to make the innovations of IBM Research directly available to customers via IBM's Global Business Services unit.

Dave has held a number of other significant positions in IBM Research, including Director of the IBM Zurich Research Laboratory, Vice President of Communication Technology, and Vice President of Software.

He joined IBM in the Research Division in 1988. He holds an M.S. and Ph.D. in Solid-State Physics from Cornell University, and an A.B. in Physics from Dartmouth College.

Dave was recognized as one of the "Fed 100" top leaders in the Federal community for 2006 by Federal Computer Week magazine.
